# XD-70

The XD-70 aluminium door system has been designed to meet the requirements of any project in terms of insulation, security and design.
With its coplanar aesthetics between frame and sash and its anti-bi-metal polyamides, it achieves the best performance while taking care of architectural avant-gardism.

Technical data

Section	70 cm
Maximum weight	200 kg
Opening cycle	1 million
Opening	Inside outside
Maximum dimensions	1800 x 2600 mm
